

AMENDMENTS TO THE DRAWINGS

The attached Replacement Drawing Sheet amends the drawing in this application by adding reference numbers 50, 52, 60, and 62 thereto, which were inadvertently omitted from the original drawing. Support for this amendment can be found in the description of the relevant portion of the drawing at page 2 of the specification, last full paragraph. This paragraph refers to "isolated heating system 50" and indicates that the heating system includes a head tank 52 for the heating fluid which is moved by pump 53 to the heater 55. Pump 53 and heater 55 are labeled in the top portion of the original drawing, thus clearly indicating that tank 52 is the box located just to the left of pump 53. Heating system 50 has been indicated in the amended drawing by a horizontal square bracket over tank 52, pump 53, and heater 55. The same paragraph of the specification indicates that reference number 60 is an isolated cooling system that includes pump 63, which pumps cooling fluid from tank 62 into cooler 65. Pump 63 and cooler 65 are clearly labeled in the top portion of the original drawing, thus, the description makes evident that tank 62 is the box just to the left of pump 63. Cooling system 60 is indicated in the amended drawing by a horizontal square bracket over tank 62, pump 63, and cooler 65.

No new matter is added by this amendment.
